A. Managing Files

a. Adding Files

You can add PDF files, you want to convert into image files. There are four ways to add the files in the grid.

(i) Drag and Drop Files

You can just drag and drop files and folders into the application and it will search for the supported file types and add into the application.

(ii) Choose the files you want to add into application

Press  button and choose the files you want to add.

(iii) Add folder and sub-folder with files into it

Press  button if you want to add all the files in one folder. You can select "Include subfolder", if you have files within sub-folder. If this check box is checked then the application will look for supported file types into sub-folder also.

(iv) Import Files

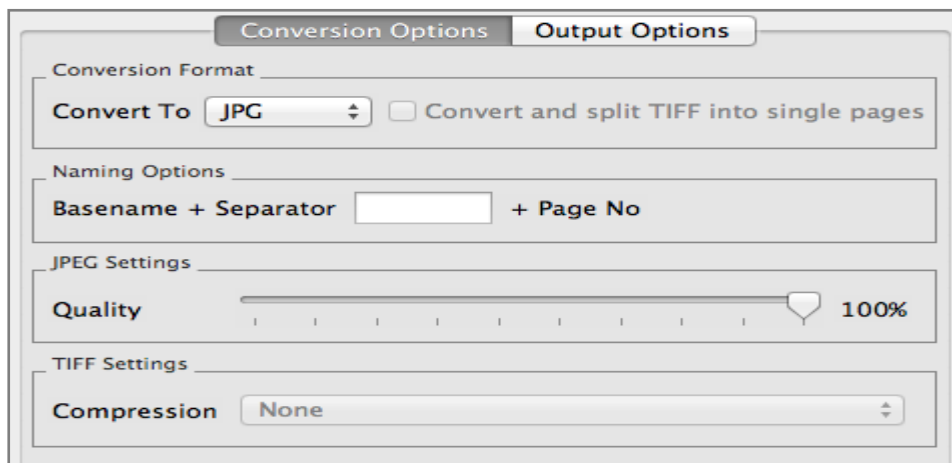

You can choose this option by clicking at  to add files into application if you have list of files into a text file. You can also copy and paste your list into text box.

b. Deleting Files: If you want to delete any file in the grid, select the file and right click -> Remove Selection or you can press Delete button on your keyboard as well or click at . If you want to delete all the files in the grid, either right click on any file -> Remove All or click at .

B. Conversion Options:

If you have taken the password-protected files in the grid, you need to give the password so that the application can read and process your inputs. If you have a common password for all the PDF files, select the files -> right click at the file ->

Provide PDF Read Password or click at  icon. Similarly, you can give the read password for any specific file as well.

a. Conversion Format

You can choose the Image format in which you want to convert the PDF.

b. Naming Options

You can choose the File Name Pattern here if you are converting PDF into any image format other than TIFF files. You can choose the Separator between the Base File name and Page Number. It creates the pattern based on your inputs and name the newly created split files. For example, when you convert one 12 page PDF Document into JPEG files then the application will create 12 JPEG files and it will be named as Base Name + Separator (Which you can choose) + Page Number. Therefore, if your PDF Document is Office.PDF and separator is - then it creates 12 files as Office-01, Office-02.....Office-12.

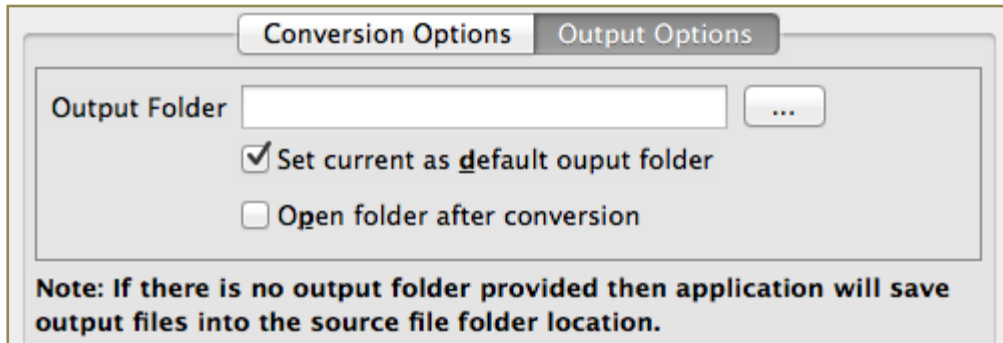

c. JPEG Settings

You can set the quality of the JPEG image.

d. TIFF Setting

If you are converting PDF file to TIFF file, you can change the compression here and if you wish to split the TIFF file into single pages also, click at "Convert and Split TIFF into single pages".

C. Output Options

You can choose output folder, where you want to save the file. You can also set the default Output folder for all the conversions.

If you wish to open the folder immediately after the conversion is over, you can select the option "Open folder after Conversion".

D. Export Export

You can export list of files you can see in file grid into text delimited text file. All the columns you can see will be in exported text files separated by a tab.
